CONTENTS

Slow energy transfer between regions supporting topographic waves. KALVIS M. JANSONS and E. R. JOHNSON *page* 1

Reynolds-stress and dissipation-rate budgets in a turbulent channel flow. N. N. MANSOUR, J. KIM and P. MOIN 15

Impulsively started flow around a circular cylinder by the vortex method. P. A. SMITH and P. K. STANSBY 45

On the rotating-fluid flow near the rear stagnation point of a circular cylinder. MICHAEL A. PAGE and STEPHEN J. COWLEY 79

Spectral study of the laminar–turbulent transition in spherical Couette flow. KOICHI NAKABAYASHI and YOICHI TSUCHIDA 101

The turbulent layer in the water at an air–water interface. TAK KEE CHEUNG and ROBERT L. STREET 133

On the preferred mode of jet instability. R. A. PETERSEN and M. M. SAMET 153

A note on lateral heating in a double-diffusive system. T. L. BERGMAN and A. UNGAN 175

Nonlinear stability of a stratified shear flow in the regime with an unsteady critical layer. S. M. CHURILOV and I. G. SHUKHMAN 187

Baroclinic instability of three-layer flows. Part 1. Linear stability. DAVID A. SMEED 217

Baroclinic instability of three-layer flows. Part 2. Experiments with eddies. DAVID A. SMEED 233

Mixing of strongly diffusive passive scalars like temperature by turbulence. CARL H. GIBSON, WILLIAM T. ASHURST and ALAN R. KERSTEIN 261

Two-dimensional superharmonic stability of finite-amplitude waves in plane Poiseuille flow. J. D. PUGH and P. G. SAFFMAN 295

Deflection of a stream of liquid metal by means of an alternating magnetic field. J. ETAY, A. J. MESTEL and H. K. MOFFATT 309

The dynamics of freely decaying two-dimensional turbulence. M. E. BRACHET, M. MENEGUZZI, H. POLITANO and P. L. SULEM 333

Limiting forms for capillary–gravity waves. M. S. LONGUET-HIGGINS 351

Electrophoresis of a colloidal sphere parallel to a dielectric plane. HUAN J. KEH and SHING B. CHEN 377

The nonlinear stability of dynamic thermocapillary liquid layers. MARC K. SMITH 391

Instability and transition in curved channel flow. W. H. Finlay, J. B. Keller and J. H. Ferziger 417

Streaming motions in a bed of vibrationally fluidized dry granular material. Stuart B. Savage 457

Oscillations of drops in zero gravity with weak viscous effects. T. S. Lundgren and N. N. Mansour 479

The repeated filamentation of two-dimensional vorticity interfaces. David G. Dritschel 511

A note on topology and magnetic energy in incompressible perfectly conducting fluids. Michael H. Freedman 549

Translational and rotational drag coefficients for a disk moving in a liquid membrane associated with a rigid substrate. Evan Evans and Erich Sackmann 553

Effects of soluble and insoluble surfactants on the motion of drops. H. N. Oğuz and S. S. Sadhal 563

A variational approach to the problem of deep-water waves forming a circular caustic. T. R. Marchant and A. J. Roberts 581

Review

Turbulence in Fluids, by M. Lesieur 598
